

Sentinel LDK CIR Release – README

Problem resolved:

This CIR fixes an issue with non-ASCII characters in the specified output folder of protected applications (e.g. Chinese or Russian characters). Issue only occurs when the .NET Envelope is used.

JIRA SR Fixed:

SM-31767, SM-31792

Delivery components:

This deliveries contains following files:

1. haspe_dotnet2.dll

- LDK .Net engine, DLL version 7.8.13806.

2. haspdnert.dll

- LDK .Net 32Bit runtime, DLL version 7.8.19342.60000.

3. haspdnert_x64.dll

- LDK .Net 64Bit runtime, DLL version 7.8.19342.60000.

4. Readme.pdf

- This file

How to use:

This CIR package should replace Sentinel LDK 7.8 installed on the target system. In case Sentinel LDK 7.8 is installed on the target system then do copy this package in the installed Sentinel LDK 7.8 folder and overwrite the files.

Run the Envelope.com or Envelope.exe file and protect your application.
